

KYP – Screening & Monitoring

Comprehensive provider credentialing and unprecedented continuous monitoring

Emphasis on front-end fraud prevention

The effectiveness of government health programs such as Medicaid and Medicare has been marred by constant reporting of fraud, patient abuse and neglect by small population of enrolled providers. Now, Affordable Care Act (ACA) through 42 CFR Part 455 Subpart E is mandating the states to focus on “Prevention” by enabling comprehensive screening and ongoing monitoring. State Medicaid agencies face considerable challenges in implementing these regulations while getting them right.

Automation is no-longer optional

ACA redefines traditional provider credentialing. Providers now need to be screened against nationwide databases including hundreds of sanction lists across state and federal agencies. It is critical that the screening is risk-based which means states need to risk score providers including background checks for high risk entities much like in the Banking industry. ACA also requires providers to be treated as business entities with comprehensive verification of identity and risk associated with all owners and controlling agents. And it is no longer sufficient to screen providers once at the time of enrollment, instead it is required to monitor monthly for ongoing compliance and full revalidation every three to five years.

States are struggling with implementation as revised screening guidelines means 10X increase in workload. Current screening processes which rely on manual lookups can no longer scale to meet this need. Even a small state with 20,000 providers would need to perform 4 million checks annually to comply with the new regulations.

Innovation is finally here...

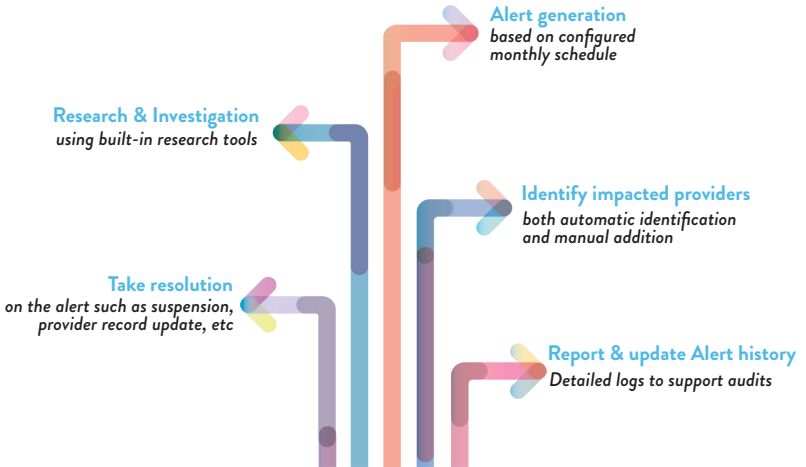

KYP's Screening module is the first and only solution that makes provider screening a completely “paperless” exercise and automates at least 80% of the activities which are done manually today. KYP is the only ACA-in a box solution to comprehensively address all provider screening requirements. Based on a unique “Predictive Risk Model” KYP uses complex entity resolution techniques to verify enrollment information against more than 15,000 best of breed data sources. KYP computes an aggregated provider risk score and an unprecedented 360 degree view of provider including history, qualifications, affiliations, adverse actions and negative news across time and geography. And all of this information is delivered to your fingertips in just minutes.

KYP's Monitoring module completely automates the monthly monitoring requirements for providers outlined in ACA Section 6028. Not only does it automate the mandatory checks against exclusion lists and licensed boards but it also provides optional checks against federal, state and local criminal records. What makes KYP monitoring unique is its “closed loop” approach wherein the process of alert generation is regulated by user feedback. KYP provides comprehensive research and investigation tools within a digital workflow to triage and decision the alerts and to adaptively learn from false positives to increase the accuracy of future alerts.

Comprehensive credentialing of providers and related parties

Unprecedented continuous monitoring

Minimizing the risk through millions of checks; 100% compliance to ACA section 6028 requirements

KYP - Screening & Monitoring powered by Digital Harbor™

- Leaders with presence in more than 20 states and screening over 500,000 Medicaid providers
- Facilitates better decision making through system intelligence and comprehensive provider information
- Lowest total cost of ownership when compared to custom apps
- Unique predictive model based risk scoring
- Drastic reduction in over-all screening time from 12-24 weeks to just over 12 days
- Comprehensive provider information aggregation for the Medicaid users with the least time and effort
- Delivers tangible Return on Investment (ROI) through fraud prevention (identifying 2 – 3 times more ineligible providers)
- Minimizes risk by continuously checking status of other important provider attributes

DIGITAL HARBOR
...Connecting the Dots

US | EUROPE | SOUTH AMERICA | ASIA
Headquarters: 1934 Old Gallows Road
Suite 350 Vienna, VA 22182

With over 18 years of expertise in providing Compliance and Intelligent Risk Management solutions, agnostic of industry, Digital Harbor has transformed the way knowledge workers respond to real-time data variations in complex business operations. Innovating healthcare operations under the flagship of "Know Your Risk" solutions, Digital Harbor is now a trusted partner of leading Healthcare organizations across the United States.
